

CANTELUPE SOLAR FARM

HASLINGFIELD, CAMBRIDGESHIRE

Cantelupe Solar Farm is located on farm land close to Haslingfield, Cambridgeshire. Although located within the green belt, the solar farm development is appropriately sited away from public viewpoints, and has excellent natural screening. There were no objections received from the local community with acknowledgement of the net biodiversity renewable energy and community gains of the project. This included the installation of a 3kW solar unit on a community building near the farm.

SYSTEM SIZE	5MW
ANNUAL ENERGY SUPPLY	1500 households
COMMISSIONED	2013
CONSTRUCTION PERIOD	7 weeks
LAND AREA	32 acres
PANEL MANUFACTURER	Solar Frontier
LOCAL AUTHORITY	South Cambridgeshire District Council

"I have been working closely with Belectric since 2012 to construct a 5MW solar farm. Despite the atrocious weather conditions during the construction phase, the staff worked long hours and were always courteous, tidy and reliable. Belectric's on site management was diligent and regular communication with the landowner was gratefully received. The best testimonial that I can give is that we are now about to undertake a rooftop solar scheme and will be using Belectric for both the planning, accreditation and construction of this scheme."

Richard Pemberton, Cantelupe Landowner
